

## Cookies notification

Interfisc uses functional, analytical and tracking cookies.

A cookie is a small text file that is stored in the browser of the visitor's computer, tablet or smartphone. Interfisc uses cookies with a purely technical functionality. These cookies are designed to ensure adequate website performance. For example, they serve to remember the visitor's preferences.

The cookies are also used for quick and optimised performance of the website. Additionally, we place cookies registering the visitors' browsing behaviour, allowing us to offer personalised content and ads. At the visitor's first visit to our website, we inform the visitor about these cookies and ask permission for placing the cookies in their browser. Undoing permission for cookies is possible by setting the internet browser to not accept or store cookies. Furthermore, any information previously stored in the browser settings can be removed.
